I. Overview of the Abstract Submission System

The Online Abstract Submission System is a piece of online software that allows easy management of the projects and posters which will be presented at the annual Rowan University Student Scholars Symposium (RUSSS).

The current website can be found at the link below:

https://stem.rowan.edu/abstractsubmission

Q. I am a student who wishes to submit an abstract to RUSSS. What do I do?

A. In order for a student to submit an abstract, he/she must first register with the Online Abstract Submissions System. If you are already registered, you may proceed to login. Upon logging in, students may create an abstract by choosing “Abstracts” in the main menu and then selecting “Add an Abstract”. Once an abstract is submitted, student authors can no longer edit the abstract and Faculty authors gain edit permissions. Once a Faculty Sponsor approves an abstract, no one may edit the abstract.

NOTE: Your abstract submission process will be much smoother if all of your co-authors and your Faculty Sponsor have registered in the Online Abstract Submission System ahead of time!

Q. I am a faculty member who wishes to sponsor an abstract for the Rowan University Student Scholars Symposium. What do I do?

A. All authors and sponsor must be registered with the RUSSS website. To sponsor an abstract, first a student must create the abstract. Once the abstract is created, a student must assign a sponsor. The student can choose this sponsor from the “Sponsors” page while editing an abstract. Once a sponsor is chosen and the abstract is submitted, it is the sponsor’s job to review the abstract and then either Approve or Return it. An abstract should be approved only after the sponsor feels it is complete. Once the abstract is approved, no one may edit it. If the abstract is not complete, the sponsor may Return the abstract to the student if they feel it is not complete. NOTE: All Faculty Sponsors must be from Rowan University and must register with the Abstract Submissions System with their Rowan University email address.

Q. May faculty initiate the abstract submission process?

A. No. Since RUSSS is a student research symposium, only student users may create new abstracts. However, no abstract may complete the submission process without the approval of a faculty sponsor. Although a faculty member may be a co-author on the abstract, they will not be able to start, or edit an abstract until the student submits the abstract for review.
Q. I am a student who worked on a project with multiple faculty. How many Faculty Sponsors may I have?

A. A student can name as many co-authors (student or faculty) as he/she likes, however, each abstract can only have one Faculty Sponsor. Keep in mind that neither faculty sponsors nor faculty co-authors may edit the abstract while the student is working on it. Once the student submits the abstract, both faculty authors and the faculty sponsor will gain edit permissions.

Q. I am submitting an abstract for work that I did without the assistance of Rowan Faculty. Do I still need a faculty sponsor?

A. Yes. Abstracts cannot complete the submission process without a Faculty Sponsor from Rowan University. However, that Faculty Sponsor does not have to be an author on the abstract. Faculty Sponsors are used to help complete the submission process. Once an abstract is submitted by the student, faculty sponsors review the content and approve or return the abstract.

Faculty sponsors for RUSSS were instituted after several students attempted to submit an abstract in violation of a confidentiality agreement with the institution where they performed their research. Thus, Faculty Sponsors should also verify that presentation of the work at RUSSS will not violate confidentiality agreements.

Faculty authors are just that; authors that happen to be faculty members as well. The system is set up to promote students submitting the abstract, therefore, faculty authors will not be able to edit an abstract until the student submits the abstract for review.

Q. What do I do if I’m having problems with the submission process?

A. If you encounter a problem with the system, please first, consult this document. If that does not answer your questions, you may then email the RUSSS Coordinators. You can reach them by emailing: RowanStem@gmail.com.

Q. I am sending an email to RowanStem@gmail.com, who are these people?

A. The administrators for the online submission system are the RUSSS Coordinators and the RUSSS Student Coordinators. The RUSSS Coordinator is currently Dr. Hecht (Dept. of Biological Sciences). The RUSSS Student Coordinators change every year, but usually they are a team of students in the Honors Concentration. All of us have access to the RowanStem@gmail.com email account, and all of us have extra permissions on the RUSSS Online Abstract Submission System. The Admins can manage any concerns you may have about the status of your abstract or the status of a user.
II. How do I register for the RUSSS Online Abstract Submission System?

To register for the RUSSS system, simply go to the link on the first page of this document and click on the “Register” button. Then fill out the entire form and click Register. You will then need to confirm your registration through a link sent to the email you provided during registration. Once you have confirmed registration, you will be allowed to enter the RUSSS abstract submission system. **If you were previously registered in the STEM Symposium’s Online Abstract Submission System, then you should already be registered in the RUSSS Online Abstract Submission System.**

Please note that while the registration system asks for your banner ID, it is not required. Banner ID is only used with the Alumni office in contacting past RUSSS presenters. You do not need to provide it if you do not wish to.

III. I forgot my email/password! What do I do?

To retrieve your email or forgotten password, simple go to the link provided at the top of this document and click on the “Forgot Email” or “Forgot Password” button. Then follow the on screen instructions to retrieve your email or reset your password. If you are still having trouble getting your account information, please email RowanStem@gmail.com for more help.
IV. Student Users

A. Abstracts

1. Creating an Abstract

To create an abstract, go to “Abstracts” in the main menu and select “Add an Abstract”. This will take you to the first page of the submission process. From here, you can enter the title, body, category, and (if appropriate) cluster designation for your abstract. Every abstract must have a title, body, and category. Please be sure to choose your abstract’s category based on the content of the abstract, not based on your major. For example, if you are an Electrical Engineer major but your abstract has to do with Biology, choose the “Biology” category for your abstract. The category for your abstract will determine where your abstract will be listed in the RUSSS booklets.

Note that clusters are optional and only pertain to presentations which do not lend themselves well to a poster format (performances or readings of student-created works, for example). If you believe that your abstract is pertinent to one of the listed clusters, please indicate this while you are preparing your submission in the database. If not, please leave the cluster selection blank.

Once you are finished working on any of the abstract screens, you should click the “save and continue” button on the bottom of the page to continue to the next step in the submission system. You can always come back and change or add anything to any page of the submission system before you submit the abstract. Once the abstract is submitted, you will lose all edit permissions.

2. Edit an Abstract

To edit an abstract, first click the “My Abstracts” under the “Abstracts” button in the main menu. You should now be able to see all the abstracts that you are linked to. Find the one you wish to edit and click “View” which appears all the way to the right of the table of abstracts. From here, you may navigate to the page you wish to edit by using the buttons on the top of the page. Please note that not all authors have edit permissions. Someone may have named you an author on their submission, but restricted your permissions to Read Only.

3. Submitting an Abstract

To submit an Abstract, first click the “My Abstracts” under the “Abstracts” button in the main menu. You should now be able to see all the abstracts that you are linked to. Find the one you wish to submit and click “View” which is located all the way on the table of abstracts. This will take you to a page that lets you review your abstract. If you are comfortable with your abstract and want to submit it, click the “Submit” button. Please note that if you do not have any requests, you will see a check box that asks you to confirm that you do not need anything to present. This is the last time you will be able to change your
requests! If you are sure you don’t need anything, you may check the box and then click “Submit”.

4. Checking an Abstract Status

To check the status of an abstract, first click the “My Abstracts” button under the “Abstracts” button in the main menu. You should now be able to see all the abstracts that you are linked to. From here you are able see the status of all your abstracts as well as other information about the abstract. You may choose to “View” your abstract which will take to you a page that will display that abstract as it will appear in the booklet including the other authors as well as the body.

B. Options

1. Account Information

To change your name, banner ID, department, or password, you can do so under “Account Information” in “Options” from the main menu.
V. Faculty Users

A. Abstracts

1. View an Abstract

Faculty members may view any abstract they are linked to by going to “Abstracts” in the main menu and then clicking one of the options. The “View All” lets the user view every and all abstracts connected to them regardless of the status of that abstract. Choosing to view abstracts by a certain status such as submitted will show all abstracts with which you are associated and that have a particular status.

2. Edit an Abstract

Faculty members may only edit an abstract after the student submits the abstract for review regardless of whether the faculty member is the sponsor of the abstract or an author. To edit an abstract that has been submitted by a student, first click “View Submitted” under “Abstracts” in the main menu. Then, find the abstract that you wish to edit and click “View” which is located on the far right of the table. From here, you are able to navigate to the page you wish to edit using the buttons at the top of the page. Note that if the student as listed you as a faculty author but has requested that you only receive view permissions, you will not be able to edit an abstract - even in the submitted stage.

3. Approve/Return an Abstract

When a student submits an abstract, it is the sponsor’s job to review that abstract and then approve or deny it. All abstracts that are to be presented at the Rowan University Student Scholars Symposium must be approved by a faculty sponsor. Once the sponsor approves the abstract, no more edits may be made by students or faculty. If the sponsor does not approve of the abstract and its content, the sponsor may choose to “Return” the abstract. This sends the abstract back to the student authors for editing and a chance to re-submit the abstract. If a student re-submits a returned abstract, the sponsor again has the option of either approving or returning that abstract. There is no limit to the number of times that a student author may submit a particular abstract.

4. Checking an Abstract Status

To check the status of an abstract, first click the “View All” button under the “Abstracts” button in the main menu. You should now be able to see all the abstracts that you are linked to. From here you are able see the status of all your
abstracts as well as other information about the abstract. You may choose to “View” your abstract which will take to you a page that will display that abstract as it will appear in the booklet including the other authors as well as the body of the abstract.

B. Options

1. Account Information

To change your name, Banner ID, academic department, or password, you can do so under “Account Information” in “Options” from the main menu.
